

The long and short of it is that past and present decisions made by City Council members have put us in the situation we are in! The employees have had nothing to do with the poor management skills that have been demonstrated in the previous years. The employees have done more to benefit this community than any on the managerial side of the City.

One thing to remember ^{is that} poor services, police, and fire lead to a decrease in property values and higher insurance rates.

Sincerely,

Macedonia Service Department
